Left and right delimeters will be enlarged if they are prefixed with \left or \right. Each \left must have a matching \right, one of which may be an empty delimeter (\left. or \right.). To specify a particular size, use the following:

\bigl, \bigr \Bigl, \Bigr \biggl, \biggr

You can also say \bigm for a large delimenter in the middle of a formula, or just \big for one that acts as an ordinary symbol.
