

**PHYS 493 Seminar Scoring Sheet: 2 slide presentation**

name of speaker (intials of reviewer): \_\_\_\_\_

TABLE I.

| Evaluative category   | Proficient | Intermediate | Developing |
|---|------------|--------------|------------|
| Structure   | ●●●●       | ●●           | ●          |
| Strong mapping slide (e.g., eliminate bulleted lists, etc.)       |            |              |            |
| Coherent organization (b,m,e for talk and slides)                 |            |              |            |
| Scope addressed   |            |              |            |
| Importance clear  |            |              |            |
| Background & credibility treated                                  |            |              |            |
| Each Slide  | ●●●●       | ●●           | ●          |
| Headline states key assertion?                                    |            |              |            |
| Evidence maximally visual? (e.g., eliminate bulleted lists, etc.) |            |              |            |
| Level of detail appropriate?                                      |            |              |            |
| Easy to read& hear& see w/o dissonance?                           |            |              |            |
| Antecedent is clear?  |            |              |            |
| Preparation   | ●●●●       | ●●           | ●          |
| Confidence, making eye contact?                                   |            |              |            |
| Avoiding distracting habits                                       |            |              |            |
| Engaging the audience   |            |              |            |
| making the time (not over, not under)                             |            |              |            |

hey that was really well done:

suggestions for getting better:
