

1. Suppose $d = \gcd(39517, 38829)$.
 - (a) Find d
 - (b) Find k, l such that $d = 39517 \cdot k + 38829 \cdot l$.
2. For each of the following find $a^{-1} \pmod{m}$ or explain why no such inverse exists. That is, find c such that $ac \equiv 1 \pmod{m}$.
 - (a) $a = 1657, m = 558764$
 - (b) $a = 60455, m = 2292657$.
3. Decipher the message:

MZCX MGCB OTHZ

knowing it was encoded with an affine cipher with key $a = 21$ and $b = 19$.
4. (Wait until Wednesday) Break the message:

JOEI RDOB AILD UTTI HOEI RDOB

knowing it was encoded with an affine cipher and contains the word(s) "affine".
5. (Wait until Wednesday) Find $\phi(336600)$
6.
 - (a) Get a picture of you with Natural World RA, PA (other than JuliAnne) or professor (other than me).
 - (b) Get a picture of a place to buy food on campus that you have never bought food at.
